Summary of Qualifications

Junior Full-Stack / Frontend Web Developer, passionate about solving challenges, with experience in writing single-page-applications using the latest WEB technologies such as Node.js, Vue.js, Vuex, React, Redux, TypeScript, Angular and MongoDB.

Graduate of the Coding Academy - An intensive coding bootcamp (640 hours) that qualifies Full Stack developers.

About me

I am a responsible and serious person, like to expand my knowledge and abilities, have the ability to self-learn, work well in a team, know how to deal with problem solving, and face new challenges.

Projects

As part of the course, I co-wrote the Airbnb marketplace app with a development team of three other programmers.

This project is a full stack project running VUE.js on the front and MongoDB with Node.js + Express.js on the back,

This app was developed in full collaboration on the Git platform with GitHub

See project: <https://airyny-yonatan.herokuapp.com>
